An Ayurvedic Liver Tonic

Accelerates FRACTURE Healing & INCREASES Bone STRENGTH

Hadjad (Winged Treebioe/Cissus quadrangularis) is translated as (the one) that unites broken bones in Hindi, while its Sanskrit name, asthisamharaka, literally means 'protecting bones from destruction. The plant, which grows in abundance in India, is credited with patent fracture healing properties in Ayurveda.

FRACCSAN

CISSUS QUADRANGULARIS + METHYLCOBLAMIN
+ VITAMIN D3+ CAL. CITRATE MALATE

Tablets

Indication :-

- * Fractures
- * Delayed union of fractures
- * Osteoporosis-induced fractures
- * Stress fractures

Active constituents:

Hodjod contains triterpenoids, B-sitosterol, quadrangularins A, B, C calcium, which influence quick regeneration of connective tissues around the broken bones.

Herb functions:

Accelerates fracture healing: Hadjod ensures early ossification (bone formation) and fortifies bone tensile strength, which accelerates fracture healing.

Increases bone mineral density: Hadjod increases bone mineral density by stimulating bone metabolism and increasing the uptake of minerals calcium, phosphorus, sulfur, and strontium by osteoblasts (bone-forming cells). The action is also helpful in preventing osteoporosis-related fractures. Relieves pain and inflammation: It relieves pain and inflammation associated with fractures.
